AI-native product designer with 5+ years experience designing intuitive SaaS platforms across cybersecurity, insurtech, and edtech. Expert in token-based design systems, scalable UI frameworks, and AI-enhanced workflows. Proven track record leading cross-functional initiatives, defining design strategy, and bringing clarity to complexity.

Work Experience

Senior Product Designer

Cowbell Cyber

Apr 2021– Current

- Built and scaled a robust design system from the ground up, including design token architecture, dark mode support, and system-wide documentation.
- Acted as a core partner to the framework engineering team, defining reusable component architecture and evolving the system to support cross-platform scalability and faster dev handoff.
- Spearheaded the first embedded SaaS partnership with Zurich North America, launching a tailored platform experience to support complex underwriting and enterprise policy management.
- Led end-to-end UX for Cowbell's broker platform, covering quoting, policy issuance, renewals, and servicing — delivering streamlined flows that balance business goals with broker needs.
- Directed multi-product design efforts, aligning roadmaps across product, design, and engineering; mentored teammates and helped shape team-wide process and design culture.
- Created scalable UX patterns and IA models for complex insurance workflows, with an emphasis on clarity, compliance, and human-in-the-loop checkpoints.
- Ran testing and design reviews to validate usability and accessibility, continuously refining features based on real feedback.

Freelance Product Designer

SpearTip Cyber Counterintelligence

Sep 2025 – Current

- Designed and implemented a scalable design system from scratch for SpearTip's cybersecurity platform, including color tokens, typography, and reusable components.
- Created interactive prototypes to streamline engineering handoff and demonstrate expected component behavior across states and flows.

UI Designer

Saga Education

Oct 2020 – Jun 2025

- Designed intuitive, accessible UIs for educational software, serving the needs of both students and tutors.
- Created detailed wireframes and interactive prototypes to communicate concepts and gather feedback.
- Collaborated with educators and stakeholders to align product design with pedagogical principles.
- Partnered with engineers to integrate UI into learning management systems, ensuring a seamless, inclusive experience.
- Developed visually engaging instructional materials and responsive interfaces to support diverse learners.
- Contributed to the development and maintenance of a UI design system for consistency across modules.

Education

2016 – 2019

Bachelor of Fine Arts
Graphic Design
University of Georgia

2017 – 2019

Certificate
Software Design
University of Georgia

2011 – 2012

Amity International School
New Delhi, India

Skills

- AI-Enhanced UX & Workflows
- Design Systems & Token Architecture
- Information Hierarchy
- Wireframing & Prototyping
- Interaction & Visual Design
- User Research & Testing
- Cross-Functional Collaboration
- Agile Product Development

Awards

2022

Cowbell's Product Designer of the Year

2019, 2018, 2017

University of Georgia's Dean List

2018

Finalist – AIGA Poster Show:

Destination Unknown

Finalist – CUBE Gallery Show:

Predicting Gen-Z

2017

Recipient – C. Clifton Chandler

Scholarship for Graphic Design

Recipient – Vince Dooley

Scholarship for the Arts
